
CMS

Posted by sstark - 2007/09/01 19:40

What CMS does everyone use mostly?

For me it's Joomla, then Word Press.

For me it's home made CMS called Helixir.
It can be seen in action on <http://www.Helixum.com>

Very nice work!

Why did you choose to make your own CMS instead of using something that already exists?

This is a large and continuing debate, especially with my fellow teachers. I like building things off of OS technology, and others insist of starting from scratch. I am curious why.
